## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 25-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Mark et al. (USP 5,303,313).

Mark et al. disclose a method of compressing digital image having a plurality of pixels (see Figs. 7A-E). The pixels are represented by a sequence of ordered symbols (see col. 4, lines 3-20) that guarantee that the symbols are occupying the same position in a respective ordered sequence of ordered symbols (see also col. 14, lines 12-22); the pixels (images) can be organized into bit planes (see col. 17, lines 4-10); run length encoding scheme can be used to compress the bit plane (see col. 2 lines 45-51). The compression scheme of Mark et al. can be use in a lossless encoding scheme using Human encoding algorithm to reduce the number of symbols in the bit plane (see col. 1, lines 20-24).

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 25-29 have been considered but are moot in view of the new ground(s) of rejection.
